DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 2, drawn to configuring packets, classified in class 375, subclass 130, 222, 354.
 - II. Claims 3-12, drawn to packet receiver, classified in class 370, subclass 286-291, 371, 394, 517.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Applicant is claiming in claims 1 and 2 a method of configuring packets. The subcombination has separate utility such as a packet receiver has other functions.
3. A telephone call was made to Steven I. Weisburd on September 6, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made

Application/Control Number: 09347774

Art Unit: 2664

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
